

Title : **CENTRALIZED INSTITUTIONAL PARTNERSHIP REGISTRY AND MANAGEMENT SYSTEM FOR CSPC-CIRL**

Alias : TEAM DUNBAR

Date : MAY 6, 2026 ☐ TD ☐ POD ☐ FOD

Secretary : JERLYN BALUIS

MANUSCRIPT			
CHAPTER	PAGE NO.	RECOMMENDATIONS, SUGGESTIONS AND COMMENT (RSC)	ACTION TAKEN (Include page number of revision made)
Title Page		Revise title, include decision support analytics.	
1	5	1.3 Objectives of the Project - General objective is to develop and deploy. - SO1: Examine existing CIRL workflow in terms of. - SO2: Develop a web-based system... - List of modules (merge some, it should reflect on your DRD). - SO3: Evaluation What is your basis for using BBT? Cite sources, discuss it in RRL 2.1.6 SQMSE. Fix your SDM.	
1	6	1.4 Significance of the Study How about faculty and students?	
1	6	1.5 Scope and Limitations Specify the coverage of the workflows/linkages of that CIRL facilities (local & international). Verify with CIRL and reflect on your paper.	
1	8	1.6 Project Dictionary Define local partnerships, institutional partnership.	
2	All	Review of Related Literature - To all RRL's per topic: - Start with topic sentence. - End with a conclusion.	
2	16	2.1.6 Software Quality Metrics and System Evaluation - There is no justification for Blackbox Testing. - Synthesis per topic then relate to current study in terms of similarities and differences.	
2	18	2.3 Gap Bridge by the Study	

		Therefore, what is the gap?	
3	AI	Update the parts of chapter 3 that are affected by changes in the SOs.	
3	28-29	3.1.1 Data Sources - Sampling Technique: - Please avoid bulleted discussion. True to all parts with the same issue. - Table 1: Respondents - What specific departments (employees)? - Include LAO, IT experts and Partner Institutions - What is the basis of your sample size? - Discuss the role of each respondents.	
3	30-32	Redundant listing. See page 28.	
3	40-41	3.2.1 Software Development Methodology The presentation of the phase must be consistent with what is in the graphical illustration.	
3	47	3.3 System Architecture Reflect all software and hardware, include deployment.	
3		3.4 Software Development Stack Specification - Table 2: Software Development Stack Specification - Include versions.	
3	56	3.7.1 Development Testing Plan - Figure 3: Development Testing Plan Flowchart - Revise based on your chosen testing.	
3	60-64	Table title should be bold.	
3	63-64	3.7.2 System Evaluation - Table 9-10: - Provide basis of your range.	
3	66	3.7.2 System Evaluation - No two tables on 1 page. - Have an implicit discussion of the 4-Point Likert Scale and the results.	
All	All	Fix citations.	
		Please update the parts of the manuscript that are affected by the changes of SOs.	

SOFTWARE PROGRAM		
MODULE NAME	RECOMMENDATIONS, SUGGESTIONS, AND COMMENTS (RSC)	ACTION TAKEN
User Management & Security	Verify with CCIRL who are the possible users of the system.	
Notification and Alert Module	Calendar & Notification (Event) + Attendance per event Verify and include discussion in your manuscript.	
Partnership Registry	Add form fields that are common per type. Tracking: Confirm who checks drafts of MOA, its stages until access preview (for revisions).	
Document Processing and Retrieval	Document upload & OCR extraction: • Verify the nature of documents, make it dynamic. System should allow adding of documents and its nature. • 1 MOA can have multiple nature. • Present in table not by tile.	
Lifecycle Monitoring	Lifecycle Monitor: Look for more appropriate term that can easily be understood.	
Digital Workflow	Include Document Request (win CSPC on online request. Have a separate UI from Partnership Request. Provide tracking of requests.	
Reporting & Dashboard / Decision-Support and Analytics	System should show monthly/yearly targets and track progress (target, current count per, lacking). There should be a reminder before the month/year ends. Include other reports that serve as decision support.	
	Technical terms used should come from what terms they currently use.
